

Atlas Copco

The Utility range

What do you integrate?

The Utility range

The dictionary defines the word utility as the state of being useful, profitable or beneficial – the Utility range combines all three benefits inside a lightweight, compact package. Its small footprint and single side service make it perfect to integrate on a utility truck. A high efficient source of compressed air, no matter where you are.

The single side service allows for easy servicing, which can be completed within the hour. All models come with a corrosion free C3 rated canopy, to guarantee higher lifetime of the machine.

Built better

More features as standard. Breaking new ground when it comes to efficiency. Made for Ambient temperature from -20 to 50 °C /C3 certified canopy to protect your compressor from corrosion.

Small Footprint

A footprint at least 10% more compact than any comparable model. Easy to transport. Stackable up to 3 levels.

STAGE

The Utility compressors are Stage V compliant.

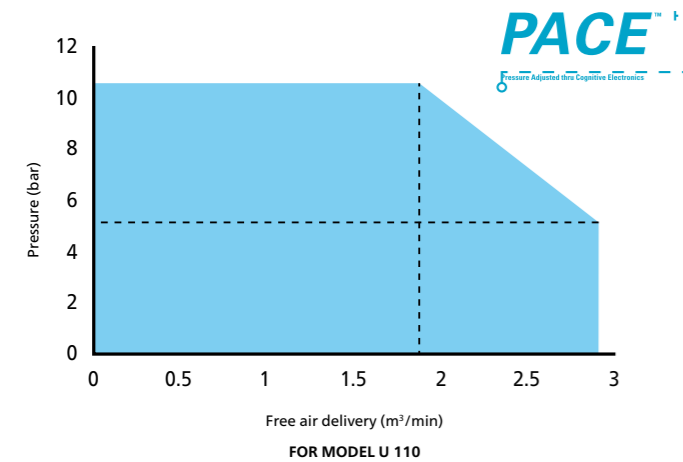

Service

Simplicity, speed and long service intervals. Service takes less than 60 minutes and no special tools are required. Easy access thanks to single side service.

Has your compressor got PACE?

PACE technology redefines the relationship between pressure and flow. A compressor with PACE technology can cover the application needs of, on average, three fixed pressure compressors.

What PACE is:

- An electronic regulation system programmed via a digital controller.
- A system that offers the widest operating pressure range within a single compressor. Allowing multiple pressure and flow combinations.
- A simple to use system with guaranteed accuracy and ensuring safety. Guaranteeing the longterm performance of the compressor.
- A system that gives you the versatility of three machines in one package.

Applications include:

7 bar: Handheld tools

8.6 to 10 bar: Abrasive blasting

7 to 12 bar: Shotcrete applications

12 to 14 bar: Cable blowing and drilling

Intuitive user operation:

- Toggle between the presets in a simple click.
- Custom pressure can be set in 3 simple clicks.
- Pressure can be adjusted in increments of 0.1 bar.

What PACE is NOT:

- A linear system where adjusting the pressure dictates the flow.
- A regulation valve where you use guess work to manually adjust the settings.

TECHNICAL DATA

Performance		U 110 Stage V	U110 PACE (with Aftercooler) Stage V	U 190 Stage IIIA	U 190 PACE (with Aftercooler) Stage IIIA
Normal effective working pressure	bar (g)	7	5-10.5	7	5-10.5
	psi (g)	100	70-150	100	70 - 150
Free air delivery	cfm	100	65-100	190	90-190
	m³/min	2.8	1.8-2.8	5.4	5.4 - 2.5
Max. ambient temperature at sea level	°C	50	50	50	50
Min. starting temperature / cold start kit	°C	-10/-20	-10/-20	-10/-20	-10/-20

Engine					
Model		Kubota D902	Kubota D902	Kubota V 1505T	Kubota V 1505T
Number of cylinders		3	3	4	4
Power output @ normal shaft speed	kW	18.5	18.5	32.5	32.5
Full load RPM	rpm	3600	3600	3000	3000
Unload RPM	rpm	2000	2000	1600	1600
Emission compliance		Stage V	Stage V	Stage IIIA	Stage IIIA

Capacity					
Engine oil	l	3	3	5.5	5.5
Compressor oil	l	5	5	9	9
Fuel tank	l	30	30	62	62
Cooling system	l	5	5	8.5	8.5
Optional extended fuel tank	l	N/A	N/A	24	24

Dimensions					
Length	mm	1580	1580	1870	1870
Width	mm	740	740	950	950
Height	mm	850	850	1040	1040
Weight (inc. fuel)	kg	488	498	704	720

AS STANDARD

- PACE system (Pressure Adjustment through Cognitive Electronics): You control the pressure and the machine regulates the flow.
- Best in class fuel efficiency.
- A footprint at least 10% smaller than comparable models.
- Starter motor protection system.
- High-humidity C3 corrosion protection coating.
- 1500 hours/two years service interval.
- Integrated lifting slots and top-hook.
- Long fuel autonomy to run a full shift.
- Heavy duty fuel filters as standard
- Spillage free frame with forklift slots and centralized drain points.
- Single side service with Spin-on oil separator element.
- Robust canopy for three layer stacking.
- Cold start and synthetic oil

OPTIONAL EXTRAS

- Generator option: Turn your compressor into a multi-function machine for both air and power. (6 kVA semi-simultaneous and a 15 kVA non-simultaneous).
- Integrated aftercooler/water separator/ fine filter (PD) to guarantee better air quality.
- Plus many more. Including customized colors, refinery equipment, hose reel and additional fuel tank.

Power Technique Solutions Portfolio

Atlas Copco's Power Technique Business Area has a forward-thinking philosophy. For us, creating customer value is all about anticipating and exceeding your future needs – while never compromising our environmental principles. Looking ahead and staying ahead is the only way we can ensure we are your long term partner.

Air compressors

Ready to go

- 1-5 m³/min
- 7-12 bar

Versatility

- 5.5-22 m³/min
 - 7-20 bar
- *Diesel and electric options available

Productivity partner

- 19-116 m³/min
- 10-345 bar

Handheld tools

Pneumatic tools

- Breakers (2.5 – 40 kg)
- Rockdrills (5 – 25 kg)
- Underground Rockdrills
- Additional Air Tools

Hydraulic tools

- Breakers (11 – 40 kg)
- Additional Hydraulic Tools
- Powerpacks

Petrol engine driven tools

- Breakers & Tie Tampers (25 kg)
- Combi Drills (23 Kg)

Generators

- Portable
- Mobile
- Industrial

*Multiple configurations available to produce power for any size application

Light towers

- Diesel LED and MH
- Electric LED
- Battery LED

Dewatering pumps

- Submersible
- Surface
- Small portable

*Diesel and electric options available

Photos and illustrations contained herein might depict products with optional and/or extra components which are not included with the standard version of the product and, therefore, are not included in a purchase of such product unless the customer specifically purchases such optional/extra components. We reserve the right to change the specifications and design of products described in this literature without notice. Not all products are available in all markets.
